About Us

Employing state of the art technologies as well as utilizing the available industrial resources, we, **V.S. Vents**, today stand at the forefront in the domain of air ventilation systems. These systems are widely used in residential and commercial sector, as they help in fresh air circulation. Over the years of commitment, we have emerged as one of the leading **manufacturers** and **suppliers** of the industry. We assure guaranteed quality at industry leading prices. The product assortment offered by us encompasses **Turbine Roof Ventilator, Wind Turbine Ventilator, Roof Ventilation Systems, Self Tapping Screws, Pre Engineered Building Systems**, and more. Fabricated with acute precision and in sync with the industry standards, these products are economical, highly functional, low on maintenance and ensure excellent performance.

Quality Compliance

Quality is not only an integral part of our operations but also an on-going practice, at V.S. Vents. Our company is committed to offer flawless range of Self Tapping Screws, SS Self Tapping Screws, Galvalume Sheets, Roof Ventilation Systems, etc. Therefore, we use only highest grade materials that are sourced from only renowned manufacturers. Also, we have hired a team of quality controllers who monitor each and every stage of production in order to make sure that established standards are being followed. In addition, they test the manufactured products on certain parameters like strength, durability, functionality, etc.

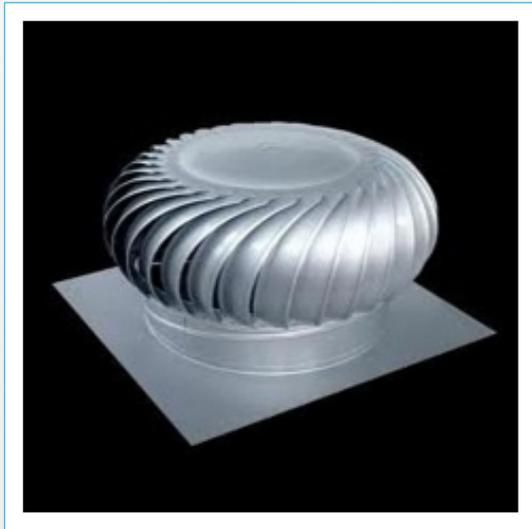

Infrastructure

Ours is a customer oriented company, and thus we always endeavor to make sure that we provide impeccable grade products to the buyers. For this, we have set up a well managed infrastructure that is strategically located in Chennai, Tamil Nadu (India) as well as equipped with all the latest facilities for prefabrication work of our structures like roof ventilation systems. Our manufacturing unit is installed with sophisticated machinery and equipment that are manned by proficient team of personnel. Further, we focus on carrying out all our processes in eco friendly manner and assure complete safety of the employees. Also, our fabrication facilities are regularly upgraded so that we can keep pace with international demands.

Our Products

Industrial Roof Ventilation Systems
